- GET /health Health

POST /api/query Query

Ask a question. Agent classifies query and decides document_search vs direct_llm vs hybrid. Returns answer, sources, reasoning_trace, retrieval_used, and confidence.

Parameters | Cancel | Reset

No parameters

Request body required — application/json

Edit Value | Schema

```
{
  "question": "Explain Retrieval Augmented Generation in simple terms"
}
```

Request URL

http://127.0.0.1:8000/api/query

Server response

Code: 200
